A MESSAGE FROM THE PRESIDENT

Book Systems is an innovator in the library automation industry and has been for nearly two decades, providing affordable products that deliver more features and demand fewer resources. The company is based in Huntsville, Alabama, where NASA's space programs and other government technologies have created a vibrant environment of innovation.

Our inspiration comes from customer conversations. At Book Systems, we stay up-to-date in the world of programming and product development. When you purchase our state-of-the-art products, be assured those products are thoroughly tested, carefully planned, and created with guidance from conversations with our customers. We listen – and then we create.

Customer care sets us apart in a positive way. When you call us, the phone will always be answered by a person. That's a Book Systems' promise. Our products are used with confidence because they're backed with our industry-leading customer support.

We create software for the Librarian / Media Specialist. You'll like Book Systems' products because they are easy to use. Our products make it easy for you to do things you may have dreamed of doing but couldn't with other systems. Imagine being able to create a report on-the-fly or to edit an item from a report.

We create software that assists the IT professional. As an IT professional, you'll like our approach. When we complete an Atriuum installation, the job is done. Your users will be able to check in and check out from your "go-live" date. You, the IT professional, will only have to be involved with the local administration of application permissions on your district or local network.

You are always in control. With your permission, a certified Book Systems' technician performs all gatekeeping and updates for Atriuum or Booktracks. Imagine the simplified maintenance requirement of managing only one server for multiple schools or libraries.

We're a growing company with a growing line of products. Book Systems has recently relocated into a larger corporate headquarters. Our customers will notice that in addition to our long-term employees, we have added some additional staff members. We continue making great advancements in providing the very best functionality and technology to both our existing and potential customers. We continue the tradition of keeping things easy-to-use as we go along. We encourage you to consider us and our products as you think about your library's future.

We're a driving force in the market; not the biggest, but equal to the best. Book Systems' philosophy continues to be "develop and deliver products and services equal to, or better than, the best in the business." Ask your sales representative about any product that you need if you do not see it within our catalog. We're constantly implementing new developments and we'll gladly assist you in finding what you need.

Sincerely,

William D. Jones

William D. Jones, MLS
CEO/President
Book Systems, Inc.

Atriuum®

Web-based Integrated Library System

When looking for the "now" generation of Web-based centralized library management solutions, consider the following:

- Centralized installation
- Centralized maintenance
- Worry-free updates administered by the software vendor
- Designed specifically for Linux or Windows 2003 Servers
- Accessible from workstations with a supported Web browser
- Accessible via a WAN or the Internet
- Optional Application Service Provider (ASP)
- Traditional library functions (listed below)

Atriuum offers it all and is the ultimate centralized library management solution for one library to multi-branch libraries or one school to school districts. Because it is 100% browser-based, patrons have better access to library materials and their library account, period. Atriuum is so easy to work with because it operates similar to other products you already use, without limitations.

Atriuum System Requirements

Workstation:

Browsers:	Microsoft Internet Explorer® v 6.0-7.0, Firefox® v 2.0, Safari™ v 1.2
Platforms	Linux®, Windows®, or Macintosh®
Monitor	800 x 600 or higher

Server:

Operating systems	Red Hat® Enterprise Linux v 4.0, Windows 2003 Server
	For a free consultation, please contact us at (800) 219-6571

Dedicated server required *. Multi-server environments are supported.

Adobe® Acrobat Reader® v 6.x or newer is required to view PDF formatted system reports.

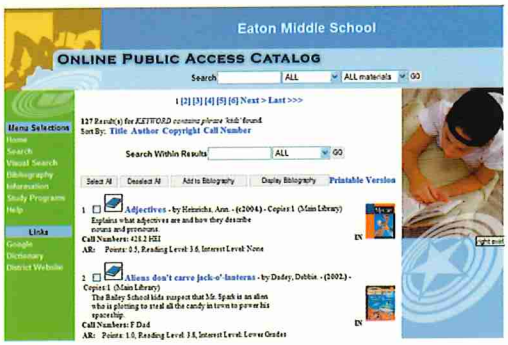
Optional hardware devices installed may require a local device driver.

Note: these are minimum hardware requirements for optimal performance.

* What's a **dedicated server**? Atriuum requires a server that runs Book Systems software only. It cannot be used for another purpose such as email. You can purchase your own dedicated server; you can purchase a Book Systems server as part of your order (GuideBook); or we can host your data for you on our server (Atriuum ASP).

Empower Patron Access

Atriuum is easily accessible and provides your patrons with various and unique options for searching library resources. It is a powerful asset in your quest for comprehensive, reliable, and easy-to-use patron resources.



KidZviZ™

The ideal Pre-K through 3rd grade library explorer's toolbox. We consulted with teachers, librarians, curriculum coordinators, and kids to provide young readers with an attention-grabbing, age-appropriate searching mechanism that is like none you've ever seen!

OPAC Themes

A refreshing OPAC concept. Don't get stuck with a generic OPAC like most systems have. Choose from a variety of pre-designed eye-catching themes. Configure any library workstation with a different theme based on your patron's needs.

ComPeer™

An exceptional searching venue. Extend patron searching beyond your library to another Atriuum-based library or libraries regardless of whether or not they are part of your library or district's network.

Web-based Access

Anytime, anywhere access to library resources. Expand your collection beyond the walls of your library building. Provide patrons with real-time access to their library account to review, reserve, and renew library materials they checked out.

Powerful Functionality at Your Fingertips

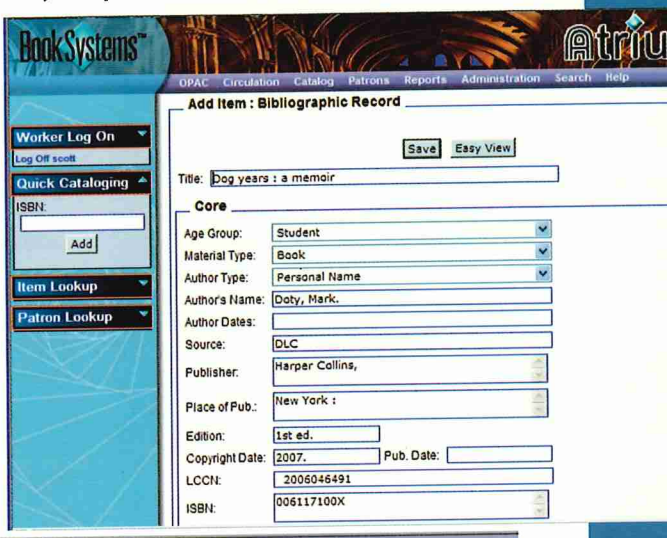
Atriuum comes equipped with traditional library automation functionality.

- Circulate materials
- Catalog items
- Access over 16 million MARC records
- Includes Z39.50 client and server support
- Includes SIP2 support
- Create and customize real-time reports
- Print barcodes and spine labels
- Search the library and the Web
- Access library resources anywhere
- View context-sensitive online help

Additionally, Atriuum offers a full complement of features you expect from more expensive systems. Imagine the ways that Atriuum will enhance your library management experience.

Supplemental Modules, Services, and Programs

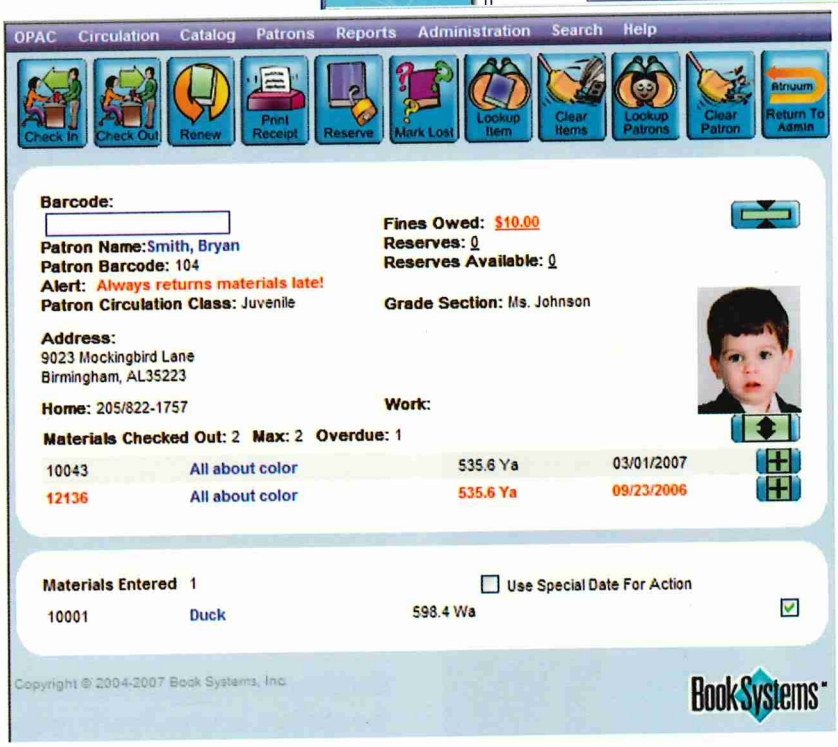
- **Serials** – manage print subscriptions
- **Acquisitions** – manage orders
- **Authority** – import and manage author and subject authority records
- **Off-line Circulation** – circulate items even when the network or Internet is down
- **Bookings** – reserve materials in advance for a future date or range of dates
- **Patron Import** – automatically load patron / student demographic data from student information systems, administration programs, or from a text file
- **Study Program Enhancement (Accelerated Reader, Reading Counts!, etc.)** – MARC enhancement service for updating your records with the current Reading Level, Interest Level, Point Value, and Quiz information (see page 13)
- **OPAC Snapshot** – subscription service that dynamically links images, summaries, profiles, notes, contents, excerpts, and reviews to your library's resources (see page 12)
- **C.E.R.F.** – subscription service for access to on-line curriculum and education resources (see page 13)
- **eZcat / eZcat Pro** – program for simultaneously searching and downloading USMARC records using multiple Z39.50 connections (see page 11)



Impressive Reporting Capability

- Generate real-time reports tailored to your needs in addition to standard reports
- Customize reports by adding/removing columns and sorting
- Create and save periodic and frequently used report templates
- Filter reports for specific data
- Select and schedule report production
- Export report data for use in other programs

Let Atriuum enhance your reporting capabilities in as many ways as you can imagine.



Atriuum ASP

Book Systems resets expectations for ASP solutions. Let Atriuum ASP handle all the IT work for your library. With this service, Book Systems hosts, manages, updates, and provides daily backup services. This is especially useful for libraries that don't have a local IT person.

Atriuum ASP is your 100% maintenance-free solution. All you need is high-speed Internet access and a supported Web browser to successfully manage your library. Yes, it's that flexible and that good. We guarantee it.

Booktracks System Requirements

Workstation:

ISBN-13 READY

Booktracks, powered by Atriuum, is a Web-based solution designed to help you control a very expensive problem within schools and school districts – management of textbook inventory. Management using Booktracks can save money by reducing the need for purchasing replacement textbooks, reduce staff time distributing textbooks, and provide accurate accounting for the distribution and return of textbooks.

Booktracks®

Powered by Atriuum®

Challenge

Textbooks represent a substantial investment for any school. A district may spend as much as $350 per student for textbooks—totaling as much as $1.75 million dollars for a district with a population of only 5,000 students. These assets leave campus each day and travel to destinations unknown. Over a semester or a year's time, many textbooks are damaged or lost. Students and parents have no personal investment in the initial cost of textbooks; therefore, some have little interest in maintaining the materials and being accountable for them.

> *An annual loss of 8% of the textbooks in a district with a population of just 5,000 students would be at least $140,000 for replacement textbooks. Districts six times that large having 30,000 students will sustain an annual loss of at least $840,000 dollars. Larger districts, with more than 50,000 students, may experience annual losses greater than a million dollars.*

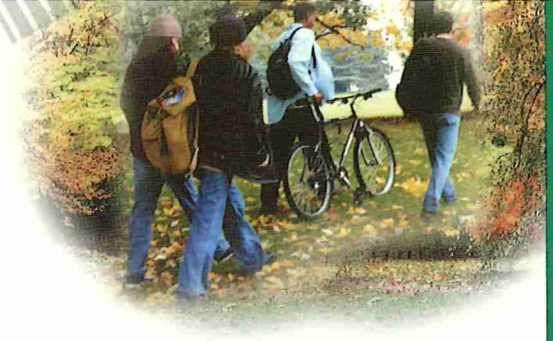
Manual tracking devices are cumbersome and slow as relates to timely notification to students who damage or fail to return textbooks. So, what is the solution to this problem?

Affordable Solution

Booktracks provides a cost-effective win-win solution to address this costly problem that persists for school districts year after year. Compared to replacement costs, Booktracks provides a great Return on Investment (ROI).

Booktracks is the ultimate centralized textbook management solution for an entire school district or for just one school. The program is easy to learn because it is straightforward and operates similar to other products you already use.

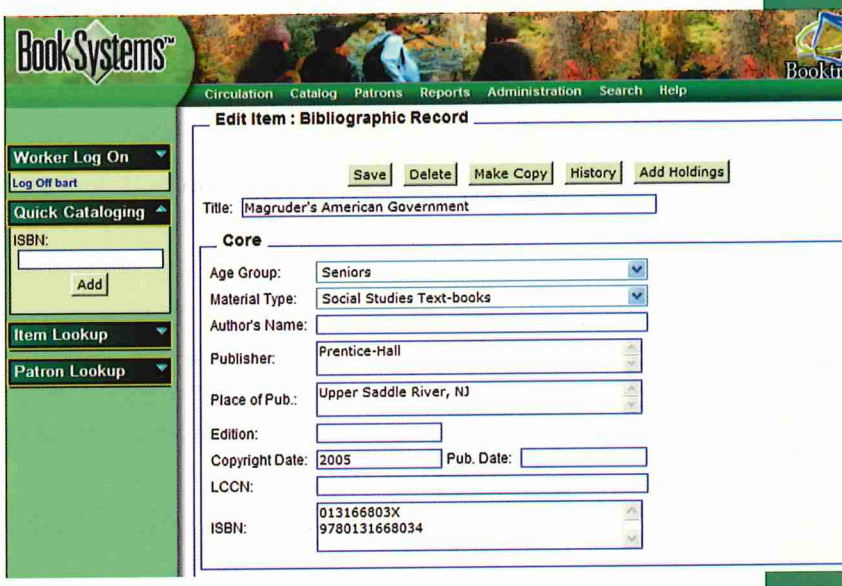
Booktracks can track the distribution of textbooks from a central site to the student to whom each textbook is issued. Intermediate steps in the distribution process are trackable, i.e., transit from one location to another, receipt of textbooks at the building level, and receipt by each student. Booktracks makes this possible because it is a Web-based product that provides access to centralized textbook data via any computer with a supported Web browser.



By design Booktracks makes possible the following:

- Centralized installation
- Centralized maintenance
- Worry-free updates administered by Book Systems technicians
- Designed specifically for Linux or Windows 2003 Servers
- Accessible via a WAN or the Internet
- Accessible from workstations with a supported Web-browser
- Optional Application Service Provider (ASP)

Accuracy and efficiency result from browser-based tracking and management of textbooks. Booktracks helps you optimize access to and availability of textbooks for your schools throughout the district.



Reports are generated quickly and easily. Report templates, that you design and name, can be saved for future use. These templates, with your options already configured, will assist you in submitting government mandated reports.

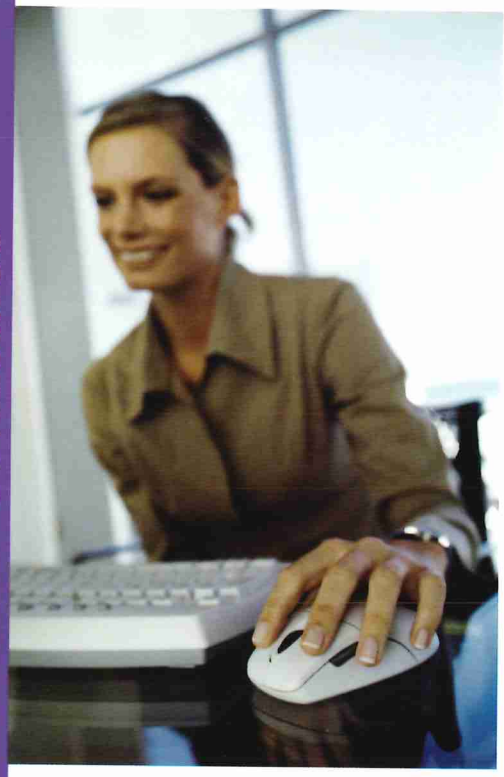
Savings and Peace of Mind

Savings realized can be even greater than the monetary cost to the district. Peace of mind is priceless! The calculations shown above illustrate the serious money associated with the cost of replacement textbooks. Such costs stress budgets and people.

Tremendous savings can result using Booktracks by issuing both accurate and timely notifications concerning damaged and missing textbooks. Such notification helps shift the burden of responsibility from the district to the student and his or her parents. Accountability for textbooks helps students grow to accept responsibility, thus reducing the number of textbooks that are lost.

In summary, savings can be recognized in the following ways:

- **Save Money**
  - Reduce losses and replacement costs
  - Prevent over-ordering of textbooks and replacement copies
  - Reduce personnel costs without compromising textbook accountability
- **Save Time**
  - Reduce IT personnel time maintaining the system
  - Issue (check-out) textbooks in two steps; receive (check-in) in one step
  - Scan barcodes for quick, accurate data entry
  - Inquire about textbook inventory anytime, anywhere
  - Keep accurate details about the condition of items automatically
- **Gain Control and Get Peace of Mind**
  - Control distribution process – through classrooms or a central location
  - Know how many textbooks you have, who has them, and the condition when issued to students
  - Generate real-time reports quickly and easily



ConCourse®

Windows-based Integrated Library System

Concourse is Book Systems' proven library management software for the Windows environment. Librarians and Media Specialists have contributed ideas making it feature rich. Our programmers take those ideas and continue to make Concourse easy-to-use. Concourse allows for easy navigation using an icon flowchart on the Navigator screen, menu options, or keyboard shortcuts to perform functions.

Any Windows-based library automation program that you choose should be:

- Easy-to-use with context-sensitive help
- Intuitive of what you expect it to do
- Meet or exceed your needs
- Well supported

Concourse meets these criteria. Librarians everywhere agree that Concourse is feature rich. Take a look at how your library can be automated quickly, saving both time and money. A free demonstration kit is available upon request.

Media & Methods AWARDS PORTFOLIO WINNER

Microsoft Certified Solution Provider

Circulation and Cataloging

Concourse ensures that performing circulation functions such as checking items in and out, reserving materials, and adding or editing patron records, is quick and accurate. It allows you to create overdue, fine, and reserve notices which can be printed for mailing, sent to patrons via e-mail, or both.

Cataloging with Concourse is simple and straightforward. You can add and edit item records quickly, create and import MARC records automatically, classify using the Dewey Decimal System or Library of Congress Classification, and define keyboard shortcuts to move between functions. Concourse is also capable of printing catalog cards and labels (spine, pocket, bookplate, and barcode).

Customizable Reports

Create unique reports fast. Concourse allows you to view or print numerous reports that are pre-configured for your convenience, such as Shelf List and Accession List. It only takes one or two mouse clicks to view or print these. Many of the twenty-two pre-configured reports may be modified (adding or removing columns of data) to specify what you need to see or want to emphasize in a printed report. The appearance of reports may be enhanced further by formatting (bold, italic, font size, etc.). Concourse provides versatility with built-in report graphing without having to export data to another program.

Filters allow you to get just the information you want. Then you can arrange, sort, preview, and print the data. Additionally, templates may be saved for future printing with dynamic update of the report data. Concourse also offers an exclusive "Drill Down" feature that displays supporting data from an executive report summary and allows you to edit an individual record directly from the report.

"We have been using our Concourse software for a little over a year and I wanted to let you know how very satisfied we are with the program and how very easily my staff members learned to use it. It is very intuitive and quite comprehensive. ... Our technician commented a few days ago that this is a surprisingly trouble free program. ... All the contacts we have had with you and your staff were very positive."

Patricia Sullivan, MLIS
Irwindale Public Library, CA

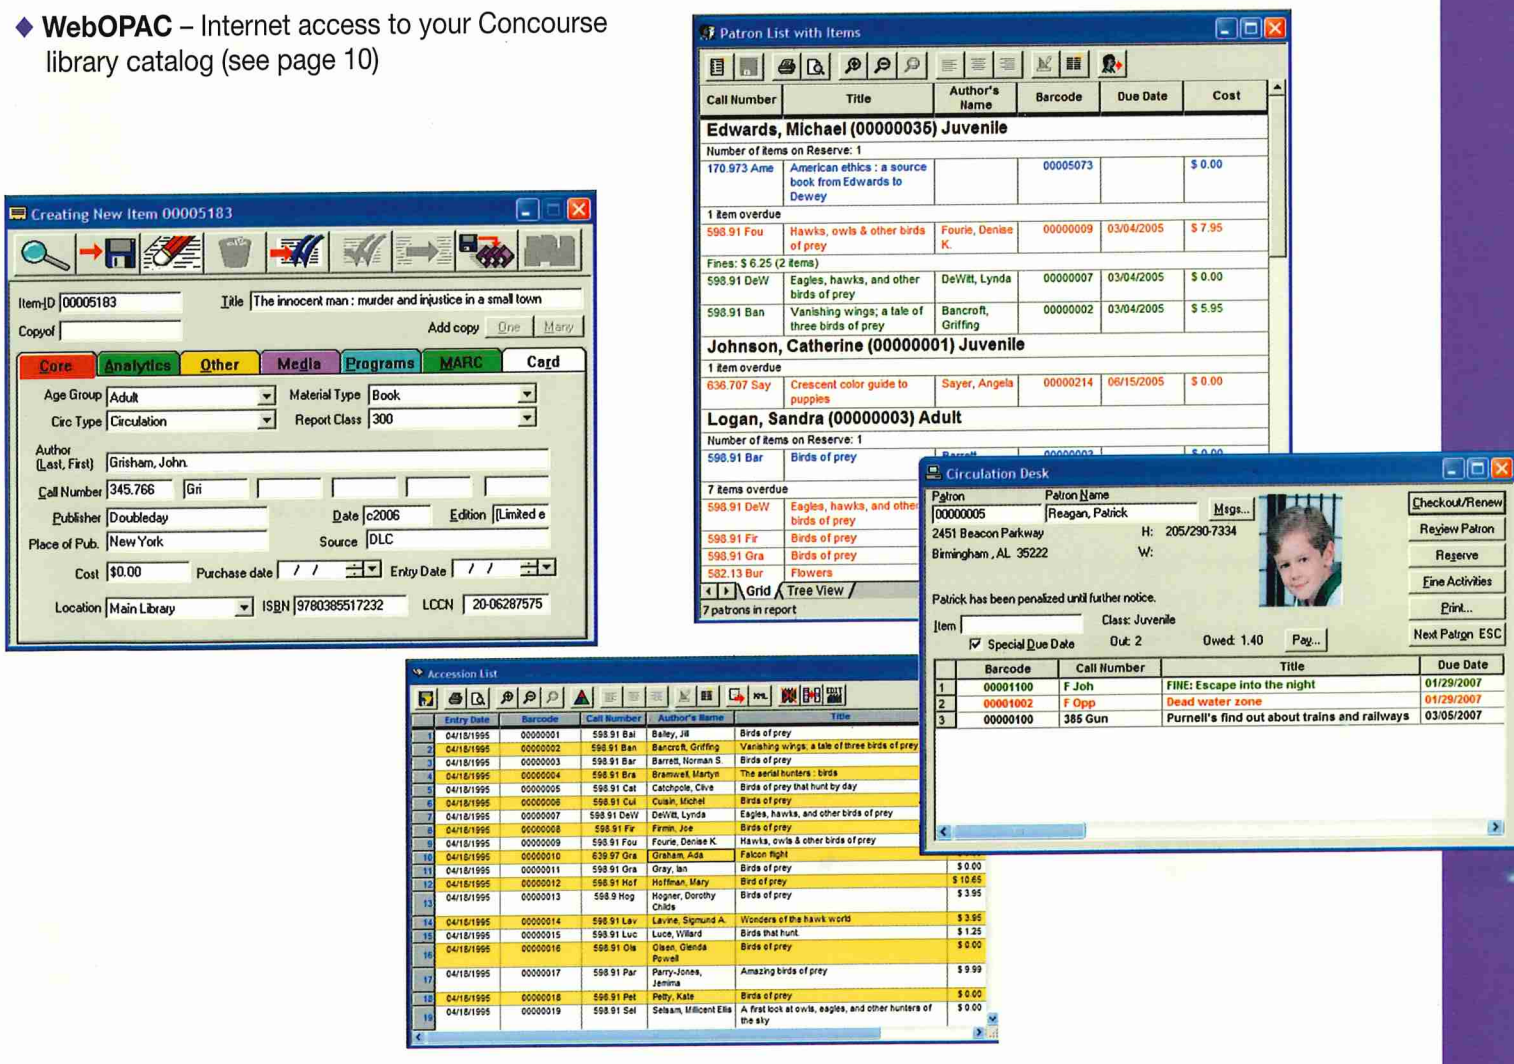
Supplemental Licenses, Services, and Programs

- **Authority** – license for global editing of Author Names and Subject Headings with the ability to create and maintain "See" and "See Also" references
- **BarcodeMaster** – license for printing dumb / smart patron and/or material barcodes
- **P-Link** – for automatically loading patron / student demographic data from administrative programs or from a text file
- **C.E.R.F.** – subscription service for access to on-line curriculum and education resources (see page 13)
- **RBS** – subscription service for worry-free automatic off-site backup with periodic frequency (see page 10)
- **Study Program Enhancement (Accelerated Reader, Reading Counts!, etc.)** – MARC enhancement service for updating your records with the current Reading Level, Interest Level, Point Value, and Quiz information (see page 13)
- **eZcat / eZcat Pro** – program for simultaneously searching and downloading USMARC records using multiple Z39.50 connections (see page 11)
- **eZhost** – Z39.50 server program to connect your library to the world and share your catalog database via the Internet with other libraries
- **eZpac** – Z39.50 OPAC client program that allows your patrons to search other libraries using the Concourse OPAC interface
- **WebOPAC** – Internet access to your Concourse library catalog (see page 10)

Concourse System Requirements

Memory	64 MB RAM for Windows 98, 256 MB for Windows NT, 2000, XP
Platforms	Windows
Processor	Pentium II or greater
Monitor	800 x 600
Disk space	55 MB must be available for programs and electronic guides, with a requirement of an additional 2 MB for every 1,000 bibliographic records.
Browser	Internet Explorer 5.5 or later is required for visual search in Concourse OPAC

Note: these are minimum hardware requirements for optimal performance.



WebOPAC®

Add Internet access to your Concourse library catalog!

The development of the Internet raised the bar for information access. Your patrons are no exception – they expect the same accessibility to their local library's catalog. Book Systems provides innovative Web-server technology for Concourse customers that can make it happen in a snap, giving your patrons 24/7 access to your library.

WebOPAC enhances Concourse by providing instant access through an Internet or local intranet connection. Using a standard Web browser from home, a favorite coffee shop, or virtually anywhere else with an Internet connection, patrons can take advantage of WebOPAC's powerful search options to view the library's collection anywhere, anytime.

WebOPAC supports Easy Word (keyword), Title, Author, Subject, ISBN, Visual, and Study Program (Accelerated Reader, Reading Counts!, etc.) searches. Even more advanced searches are available with WebOPAC's Combo and Expert (Boolean logic) searches.

Your patrons will also like the WebOPAC themes - KidZviZ (Pre-K through 3rd grade library explorer's toolbox) and other eye-catching themes make searching appealing to all ages. Likewise, patrons will enjoy the benefit of searching for cataloged electronic media resources like e-books, PDF files, Word documents, and Web sites.

WebOPAC allows patrons to check items on loan, to request items, to build their own bibliography lists, and more. Access is secured with a PIN number.

WebOPAC System Requirements

Memory	64 MB RAM for Windows 98, 256 MB for Windows NT, 2000, XP
Platform	Windows
Processor	Pentium II or greater
Disk space	Concourse Network Version required, plus 10 additional MB hard disk space and a static IP address.

Note: these are minimum hardware requirements for optimal performance.

Supplemental Services

- **C.E.R.F.** – subscription service for access to on-line curriculum and education resources (see page 13)
- **OPAC Snapshot** – subscription service that dynamically links images, summaries, profiles, notes, contents, excerpts, and reviews to your library's resources (see page 12)

Actual customer photo of a hurricane-ravaged library. RBS to the rescue!

Remote Backup Service RBS™

From hardware failure to hurricanes, disasters never strike at a good time. Is your anti-virus software up-to-date? Do viruses go undetected? We can protect against the havoc that any disaster could wreak on your system, and have you up and running again in no time. Subscribe and use Book Systems' Remote Backup Service (RBS) to recover your Concourse database after disaster occurs.

RBS is an exclusive service for Concourse customers. As a subscriber, you receive immediate benefits of security and peace of mind. Protect your library's investment by implementing a disaster recovery plan using RBS to store your database files off-site. You decide how often you need the backup to occur and we do the rest.

How RBS works

Your database files are securely uploaded to a server at Book Systems. Once we receive your files, they are scanned and verified. If corrupt data or a virus is found, we notify you immediately. Necessary steps will be taken to remove virus(es) and/or repair the damaged data. Should you need help with data that is overwritten, damaged, or is missing — simply contact our Technical Support for aid in restoring your backup.

Product #90-RBS

eZcat & eZcat Pro System Requirements

Memory	64 MB RAM for Windows 98, 256 MB for Windows NT, 2000, XP or later
Platform	Windows
Processor	Pentium II or greater
Disk space	5 MB
Network	Internet access required
Monitor	800 x 600

Note: these are minimum hardware requirements for optimal performance.

"I love eZcat Pro! It is amazing how much I can accomplish using this product. The MARC records that I locate are good records, and the export process works great. I recommend eZcat for anyone who does cataloging!

Buffy Edwards
Library Information Specialist
Norman Public Schools, OK

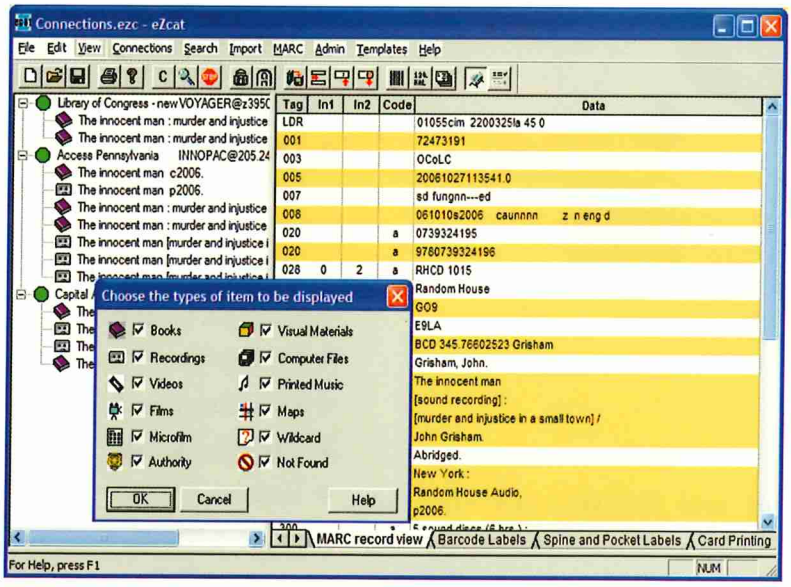
eZcat®

eZcat is a feisty cataloging tool that really hits the MARC! No more per-record fees. No more out-of-date CDs. No more online subscriptions.

Internet access allows eZcat to help you take advantage of Z39.50 technology by obtaining free MARC 21 records. Search multiple library databases simultaneously (Library of Congress and over 400 other publicly listed libraries) and retrieve cataloging data for all of your library materials (books, video, audio, computer files, etc).

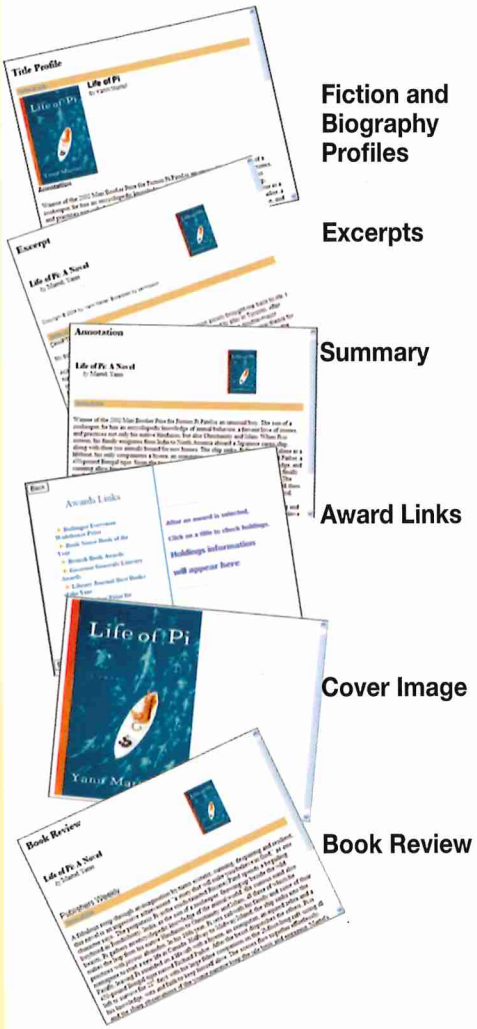
Additional features of eZcat include:

- Download one or many records instantly!
- Search for MARC records in batch
- Use with other library automation systems that import MARC 21 records
- Add Study Program and/or local holding information before export



eZcat Pro supports all the features of eZcat, plus powerful printing and editing features.

- **Import MARC record files** – review existing MARC record files you receive from book vendors before you import into your automation system
- **Edit MARC records** - create new fields, configure the leader, add or remove fields and sub-fields, accept or change sub-codes and tags, configure local holdings, apply templates, and more
- **Print labels and cards** – print barcodes, catalog cards, spine and pocket labels, as well as Study Program labels (Accelerated Reader, Scholastic's Reading Counts!, etc.)
- **Batch operations** - perform global edits and/or validation on your MARC 21 records



OPAC Snapshot

OPAC Snapshot's enhanced content improves and beautifies WebOPAC and Atriuum OPAC. Best of all, this easy-to-implement, affordable solution works seamlessly. You can be confident that the additional information will make your library shine, and increase usability and efficiency for you and your patrons. Subscribing to OPAC Snapshot is the best way to provide the content your patrons have come to expect. All content is hosted off-site, so it won't strain your library's resources or storage space. Empower your WebOPAC or Atriuum OPAC and inspire your patrons to turn to your library for all of their information needs. Select any combination of the following elements:

- **Annotations (summary).** Access over 1,860,000 summaries and annotations for fiction and non-fiction titles.
- **Author Notes.** Biographical notes about the author are taken directly from the book jacket. Over 161,000 author notes are also available.
- **Book Reviews.** 738,500+ book reviews are available from various sources, including Library Journal[1], School Library Journal[1], Publishers Weekly[1], Criticas[1], Booklist[2], Choice[2], The Horn Book[3], and Kirkus[4].
- **Cover Images.** View more than 1,900,000 full-color images for book, video, & DVD covers.
- **Fiction and Biography Profiles.** Profiles for 135,700+ works of fiction are provided using attributes such as Main Characters, Settings, Author Notes, Plot Summaries, Special Notes, etc.; 9,200+ biographies contain a broad range of headings such as Name and Background, Occupation, Achievements, etc.
- **Tables of Contents.** Available in numerous formats, 930,500 tables of contents provide an assortment of keyword access points.

Additional elements available include:

- Awards
- Books in a Series
- Find Similar Titles
- First Chapters & Excerpts
- German Profiles
- Spanish Profiles
- Video & Music Profiles

For more information about any of the additional elements, please contact your sales representative.

"Having used Concourse and eZcat for several years, the next logical step was to provide our catalog to our patrons at home through the Internet. WebOPAC is the best product I've seen available for the money, expecially for small libraries with tight budgets. It's user-friendly... and easy to navigate. From an administrator's viewpoint, it's easy to configure and maintain. I would highly recommend this product to any library looking to provide even better service to their patrons."

Shannon Surly
Library Director
Evansdale Public Library, IA

Study Program Enhancement Service

Book Systems offers an invaluable service to enhance your MARC records with complete Accelerated Reader or Reading Counts! data, based upon the quizzes you own. You can spend more time teaching your students by eliminating the tedious task and hours of having to manually enter reading program information into your library automation system. As a result, you will maximize your reading program investment by promoting frequent use of your reading program titles, and making it easier for your students to find books matching their reading levels.

Product #20-ARRCES *(First year subscription)*

Product #60-ARRCES *(Subsequent years)*

Accelerated Reader™

LEXILE®

SCHOLASTIC READING COUNTS!

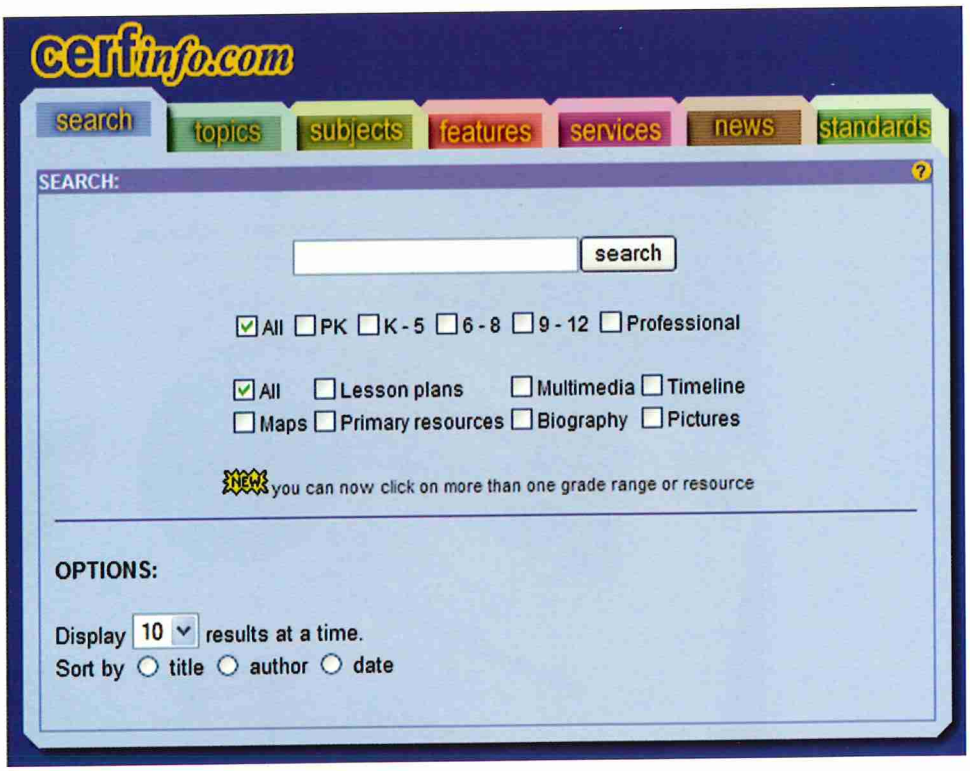
Curriculum & Educational Resource Finder (C.E.R.F.)

The Internet is disorganized, often inaccurate, and potentially dangerous when used to support curriculum standards. C.E.R.F. is your partner in providing site selectors, catalogers, programmers, data processing technicians, and researchers. It integrates seamlessly with Concourse OPAC, WebOPAC, and Atriuum OPAC.

C.E.R.F. identifies, indexes, stores, accesses, communicates, and maintains K-12 Web site information, curriculum standards, browsers, and cross-referencing.

Subscribe to C.E.R.F. to solve your electronic resource management challenges and give your teachers and students additional learning resources.

Product #30-CERF



Electronic conversion from other systems is easy. Convert from:

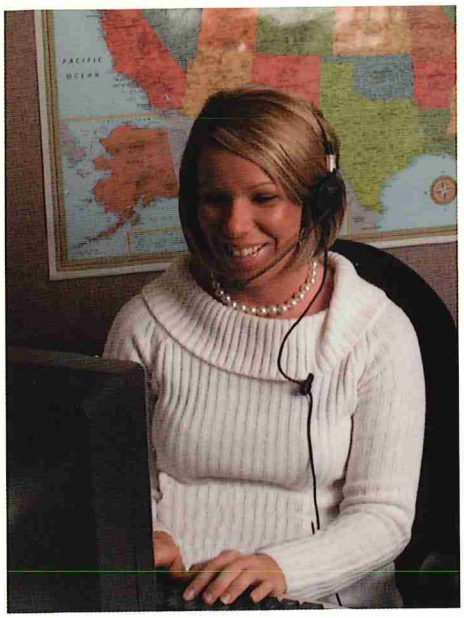
Technical Support



"Book Systems' tech support was the selling point for me when it came to choosing an automation program. I have been extremely pleased with the support I have received. From the person (keyword 'person') who answers the phone to the sales and tech support staff, my calls have been handled with courtesy and promptness. "

Vicki Davis, Media Specialist
St. James School, CA

Book Systems takes pride in providing our customers with industry leading support. Our friendly, courteous technicians are always ready to assist you. When calling during regular business hours, a "live" person will answer the phone—no recorded messages!

Our support team consists of technicians trained to answer questions and/or solve problems related to the use and operation of Book Systems' software. Our Technical Support / Customer Service Department provides a full range of services.

- **Toll-Free Support Number.** Call us Monday through Friday between 7am - 7pm CST.
- **2-Hour Call Back.** Our Help Desk Operators are trained to answer general questions regarding our products. If necessary, a certified support technician will contact you within a guaranteed 2-hour call-back time.
- **E-mail Support.** Send us an e-mail stating your problem or question, and a technician will respond within 24 hours. Get your questions answered, without having to spend time on the phone.
- **Forum.** Our on-line user's forum is available to all of our customers who have an active Customer Service Agreement (CSA). Communicate online directly with our support technicians.
- **Concourse Listserv.** Concourse customers may join our listserv to gain knowledge and share ideas with other Concourse customers. Visit our Web site at www.booksys.com for more details.
- **Free Updates / Enhancements.** The first year Customer Service Agreement (CSA) is included with your software purchase. When your CSA is kept current, you will receive free product updates and enhancements, in addition to telephone support.
- **Remote Support.** We offer support via the Internet or PC Anywhere®. A trained technician, with your permission, takes direct control of your computer to assist and advise you in trouble-shooting/ repairing your Book Systems' software.

Training

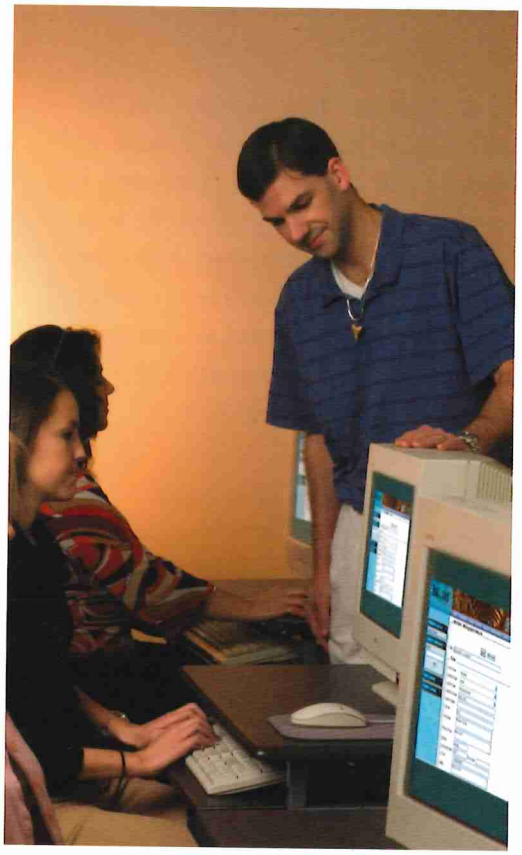
Continuing education is essential to keep pace with the constant changes in technology. Book Systems helps you work effectively by offering a variety of training options to meet your needs.

Topics include how to:

- Catalog bibliographic records
- Use eZcat to assist in cataloging materials
- Circulate materials; i.e., Checkout, Reserve, Renew, Assess Fines, etc.
- Filter, create, format, sort, and print reports and save report templates
- Configure and print spine, card/pocket, and barcode labels
- Configure OPAC
- Print overdue notices and form letters
- Perform inventory and much more!

"Amazing amount of material covered. Trainer very well prepared, organized, and on target. Knows material well. A pleasure to take the course."

Janet Korzow
Librarian/Resource Manager
St. Paul School, Valparaiso, IN



In-House Training

Book Systems offers training on Concourse and Atriuum at our corporate office training facility in Huntsville, Alabama. This two-day session is held in a classroom equipped with computers so that each attendee experiences hands-on participation. Visit our Web site at www.booksys.com for in-house training schedules.

Product #80-ATRN103 *– Atriuum In-House Training*

Product #80-2DIHT *– Concourse In-House Training*

On-site Training

On-site training is available for customers who choose to have a certified Book Systems trainer come to their site. We can tailor a schedule specific for your staff and their skill level. On-site training will make the most of your software purchase, and will increase staff effectiveness greatly because everyone gains more from working in a familiar environment. Follow-on training gives previously-trained users a boost and acquaints them with additional features added to Book Systems' software.

Product #80-ATRN101S *– Atriuum On-site Training*

Product #80-DTRN *– Concourse On-site Training*

Online Training

Book Systems realizes that travel may not be an option for all customers, so we also offer interactive training via the Internet. Online training is designed to deliver real-time, cost-effective training that is held at your convenience right in your own library. All that is needed is a high-speed Internet connection and a telephone. Online training is recommended for one-on-one training.

Product #80-ATRN101L *– Atriuum On-line, Web-based Training (8 hours)*

Product #80-WEBHR *– Concourse On-line, Web-based Training (per hour)*

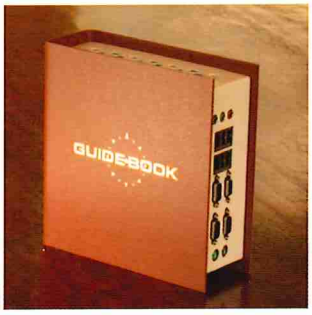
GUIDE•BOOK™

Book Systems' Exclusive Server

Only Book Systems offers a distinctively-styled and compact server optimized to run your library automation or textbook products. When you receive your GuideBook, just plug it in and your library or textbook management solution is up and running with the finest automation product combination in the world. GuideBook is delivered pre-loaded with your customized solution. Ask your sales representative about this revolutionary combination of hardware, software, and services.

Product #10-AWBSSVR – *GuideBook Server with Atriuum loaded*

Product #15-AWBSTSVR – *GuideBook Server with Booktracks loaded*



Barcode Scanners

A barcode scanner is an integral part of your automated library system. It increases both speed and accuracy of circulation transactions. Book Systems offers a variety of quality devices that will satisfy your library's needs. Stationary barcode scanners must be attached to the computer. Portable scanners are more versatile and can assist you in performing inventory. Please contact your sales representative for more information about portable solutions.

Atriuum®

You *Do* have a choice...

Distributed or *Centralized* Library Management with your individualized library settings!

Atriuum® offers school districts and multi-branch libraries a cost effective, easy-to-use, and easy-to-maintain library management solution. Because Atriuum is a Web-based application, it is installed at one central location and may be accessed anywhere using a browser.

Atriuum utilizes today's technology, giving you and your patrons the best access to library resources while decreasing costs.

- Real-time reporting
- Web-based application for Windows or Linux
- Centralized database
- Union search results
- Browser-based interface
- Fast and easy access from anywhere
- Single software installation

Spend time with your patrons, not your computers!

- User-Friendly: Clutter-free screens put it all at your fingertips for quick learning.
- Quick Cataloging: Catalog with speed and efficiency. Instantly access over 16 million MARC records. Or, search more connections using eZcat and drop records right in! (eZcat license available for additional fee.)
- Configurable: Flexible design of functions and reports lets you be in control.
- Always Available: Continue circulating items even when the network is down.
- Low-Maintenance: Software backups, updates, and maintenance are centrally managed.
- Capable: Retrieve real-time library data faster than ever before.

Easy access to resources for your patrons.

- Browser Accessible: Access to library resources anytime, anywhere.
- Search Friendly: Visual (graphical) and/or text-based searching.
- Access More Resources: Search your collection and access on-line curriculum and education resources.*
- Content Enrichment: Images, summaries, profiles, notes, contents, excerpts, reviews, and more dynamically linked to your resources.*

* Subscription services for an additional fee.

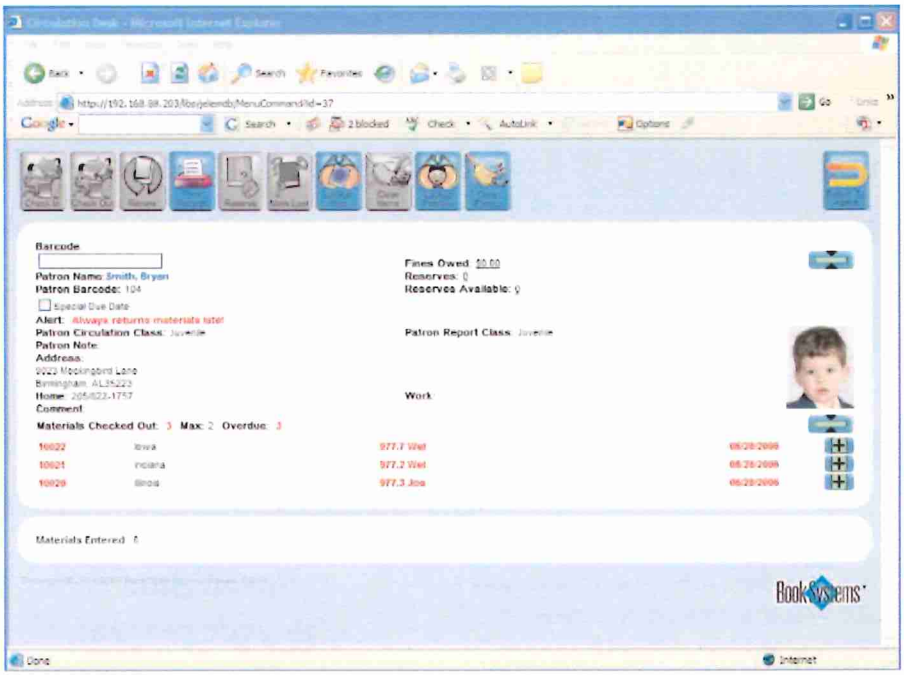
Atriuum®



Powerful, user-friendly interface allows you to use Atriuum easily with minimal learning required!

Atriuum provides a full complement of features expected in today's library automation systems. Libraries utilize Web browsers and Internet connections, minimizing the need for library IT personnel and/or library staff to provide computer system support.

- **Flexible**
  Customize Atriuum to fit your library's policies, holdings, etc.
- **Convenient**
  Atriuum is available wherever you can access the Internet via a browser.
- **Powerful**
  The power of the Internet with a SQL Database provides robust performance.

Quality software designed specifically to meet your library needs!

- Microsoft Internet Explorer® 6.0+
- Apple® Safari™ 1.2
- Firefox®

Supported Platforms are:

- Linux®
- Windows®
- Macintosh®

- Adobe® Acrobat Reader is required to view PDF formatted system reports.
- Optional hardware devices installed may require a local device driver.

Graphics Resolution:

800 x 600 or higher

Server Hardware:

Dedicated server required

Server Software:

Runs on Linux or Windows operating systems

Supported Operating Systems:

- Red Hat Enterprise (V. 4 or higher)
- Debian (V. Sarge)
- Windows 2003 Server

Custom Specifications:

For a free consultation, please contact us at **(800) 219-6571**.

Because technical needs vary, Book Systems will work with you to identify the specific needs of your district/library system. A Project Manager will be assigned to assist in defining the ideal system requirements for optimal performance. Our recommendations will be based on the bandwidth and transaction volume for your situation.

Atriuum®

Frequently Asked Technical Questions

Which Web browsers will Atriuum support?

Atriuum supports Internet Explorer® 6.0 and higher, Mozilla® Firefox®, and Apple® Safari™.

Does Atriuum run simultaneously on the same server with Microsoft® IIS?

Yes, Atriuum has a built-in Apache server application, which can operate on the same server running Microsoft IIS as long as they are using different ports.

What type of database does Atriuum use?

Atriuum uses PostgreSQL®, an advanced open source database. For more information, visit http://www.postgresql.org.

Can Atriuum be accessed through a firewall?

Yes, Atriuum can be configured with a proxy server to limit and restrict firewall traffic, so only the proxying Web server can access Atriuum. By default, Atriuum uses port 80 for HTTP and HTTPS. For use of the Quick Cataloging feature, Atriuum uses a built-in Z39.50 client which typically uses port 7090 (Library of Congress).

Are there advantages to running Atriuum on a Linux® server vs. Windows Server™ 2003?

Atriuum will run on either network operating system; however, there are some advantages to running Atriuum on a Linux server. Linux has lower annual licensing costs and provides high performance even on low performance servers. Many leading computer manufacturers such as Dell®, HP®, and IBM® provide solutions with Red Hat® Enterprise pre-installed.

Will my library still be able to function if the network or Internet connection goes down?

Absolutely! You can still check items in and out while your network is down by using Atriuum's Offline Circulation Tool or the Commuter Shuttle portable hand-held device. Once the network is restored, all circulation transactions captured by the Offline Circulation Tool or Commuter Shuttle can be automatically synchronized with Atriuum. The Commuter Shuttle can also be used as a portable inventory scanner.

How many simultaneous library configurations are supported?

Atriuum supports an unlimited number of simultaneous library configurations allowing for easy expansion as your needs grow.

Does Book Systems® provide complete turn-key solutions?

Yes, Book Systems provides a complete turn-key solution with Atriuum pre-installed on Dell servers, running Red Hat Enterprise or Windows Server 2003.

System Requirements

- Client Workstations: Any workstation running Atriuum supported Web browsers and Adobe® Acrobat® Reader® or an equivalent PDF reader. Other optional installed hardware devices may require local device drivers.
- Graphics Resolution: 800 x 600 or higher.
- Server Software: Runs on either Red Hat Enterprise or Windows Server 2003.
- Server Hardware: Dedicated server required.

Number of Libraries (1-10): Single server with Dual Pentium® IV processors, 2 GB RAM, with 20.0 GB of available hard drive space.

Number of Libraries (11-20): Single server with Dual Pentium IV processors, 4GB RAM, with 40.0 GB of available hard drive space.

Number of Libraries (20+): Book Systems will provide consultation for customers of this size. Atriuum can be configured to run on 2 or more machines to accommodate any number of libraries. Standard redundancy and fault tolerance features are recommended for any configuration.

Custom Specifications: For a free consultation, please contact us at **(888) 289-1216.**

ExpressO Specifications

Basic Features

Operating System:	Microsoft Windows CE 5.0
Supported Software:	Atriuum, Booktracks powered by Atriuum, and Guidebook pre-loaded with either software
CPU:	Samsung 2440 400 Mhz
Memory:	64MB RAM x 128MB Flash (standard)
Display:	2.8 in. 1/4 VGA, 240 x 320, TFT color display with touch screen
Image Engine:	5300SR VGA Area Imager with High-Vis bracket aimer [Caution - use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.]
Keypad:	29-key numeric-shifted alpha keyboard Backlit Six programmable function keys
Sound/Voice:	On-board speaker, microphone, and standard headset jack
Commmunications:	RS-232/USB connector, IrDA port
Power:	Li-ion battery 3.7V / 2200 mAh / 8.1 Wh (standard)
Charging:	5.0V DC input through side access or USB/serial connector
Charging Peripherals:	AC wall adapter Charge/communication cable **Homebase:** Single-bay terminal charger

Wireless

WPAN (standard):	Bluetooth Class 2, version 1.2

Physical

Operating Temperature:	14° to 122° F (-10° to 50° C)
Charging Temperature:	32° to 104° F (0° to 40° C)
Relative Humidity:	95% humidity (non-condensing)
Construction:	High impact resistant PC/ABS housing magnesium alloy internal chassis with component shock mounts
Structural:	4 ft. (1.2 m) multiple drops to concrete, all axis, and across operating temperature range
ESD:	**Air:** +/- 12k Vdc **Direct:** +/- 8k Vdc
Environmental:	IP54 rating rated for blown dust and water intrusion
Dimensions:	7 in. long X 2.7 in. wide X 1.8 in. deep (17.8 cm. long X 6.9 cm. wide X 4.6 cm. deep)
Weight:	Approximately 11.7 oz.
Regulatory and Compliance:	**Safety:** cUL 60950, NOM, EN60950, BSMI CN14336, CCC GB4943, PSB, SIRM **EMC:** FCC Part 15 Class B, ICES-003, EN-301 489-17, EN55022, EN55024, BSMI CNS13438, CCC GB9254, MIC, AS/NZS 3548 **Radio:** FCC 15.247, RSS-210, COFETEL, EN 300 328-1, EN 300 328-2, SRRC ETS 300 329, IDA, SIRM, MIC, ARIB STD-T33 & T66, AS/NZS 4771

Homebase Charging Unit

Features

- **Fast Charge: Fully charges a Li-ion battery in less than four hours**
- **Direct Communications: USB 1.1 (12 Mbps) port connects the ExpressO to a client computer**
- **Docking Status: Easy to view LED displays successful docking status**

The base unit is a compact storage and rugged charging and communication cradle for the ExpressO when not in use.

Atriuum®

ExpressO™

PORTABLE CIRCULATION & INVENTORY SCANNER

Features:

- **Small Ergonomic Design:** Contoured, narrow body with integrated finger saddle
- **Built-in Linear Imager:** Provides fast reliable scanning
- **Vibrant Color Display:** 2.8 in 1/4 VGA color display with touch screen use
- **Microsoft Windows CE 5.0:** Powerful, industry standard platform

Introducing Book Systems' newest line of portable circulation and inventory scanners. ExpressO offers the same functionality as the previous generation portable devices, but is much more powerful and offers a graphical user interface.

Librarians can circulate items, pay/waive fines, move items, and perform inventory. The ExpressO is designed to provide convenient operation in the library, classroom, bookmobile, or wherever needed.

What makes the ExpressO unit so powerful and easy-to-use?

ExpressO uses Windows CE OS and a powerful SQL database engine. This gives the ExpressO unit superior graphics, color quality, and fast item or patron lookup functionality. Synchronization to Atriuum or Booktracks is a breeze and does not require any external client application to load. Using a direct connection via any USB port, data is easily uploaded into Atriuum or Booktracks.

No need to worry when there is a loss of power in your building. Use the ExpressO as a backup device for off-line circulation. Using a fully charged Li-ion 3.7V rechargeable battery, gives the ExpressO continuous power to operate for several hours.

Express Check-IT - Options

Touch-Screen (Optional)

(Actual size not represented)

The touch-screen 15" (viewable) flat-panel monitor offers the ideal touch screen solution for Express Check-IT. The sensitive touch response screen recognizes precise location and amount of pressure applied with a finger.

- 1024 x 768 Resolution for sharp brilliant images of text and graphics
- Image brightness 230 cd/m² and 500:1 contrast ratio
- 16 ms typical response time enable crisp and clear images
- Viewing angles of 125 vertical and 140 horizontal degrees

Finger-Reader (Optional)

(Actual size not represented)

Improves speed and accuracy of your library circulation. Patrons quickly become accustomed to automatically identifying themselves. Protects the identification of your patrons and does not store the fingerprint image.

- Supports Windows 98, 2000, NT or XP
- Requires USB connection

Linear Imager (Required)

(Actual size not represented)

Stationary Linear Imager w/hands-free stand and USB connection. Quickly reads even damaged and poorly printed barcodes.

- Trigger, Flash or Continuous modes supported
- 270 scans per second
- Working range from .5 inches to 18 inches from barcodes
- Durable, designed to withstand 5 foot drops

Book Systems offers a complete turn-key self-check out/in solution (pictured above). The Express Check-IT module requires a license to be activated. A stationary barcode reader is required.

Express Check-IT
(System Requirements)

Workstations:

Browser:	**Microsoft IE v 6.0-7.0, Firefox v2.0, Safari v1.2**
Platforms:	**Linux, Windows, or Macintosh**
Monitor:	**800 x 600 or higher**
Hardware:	**Linear Imager barcode reader or equivalent**

Atriuum®

Express Check-IT™

SELF-CHECK CIRCULATION MODULE

In today's world, patrons have become familiar with the various self-service options offered by retail and national chain stores. Many patrons prefer the flexibility and convenience these services offer. As librarians, there is a never-ending task of figuring out ways to improve the efficiencies and workflows within the library, thus giving more time to better serve your patrons.

Give your patrons what they expect while improving your staff's circulation workflows. Using Book Systems' Express Check-IT powered by Atriuum, provides your library an economical self-checkout solution and adds a convenience for your patrons.

Choose from a variety of configurations to decide how Express Check-IT can best serve your patrons and improve your circulation workflow efficiencies.

- **Intuitive User Interface**
  Easy-to-use interface with optional touch-screen simplifies the checkout process for your patrons, making it more efficient
- **Improve Circulation Workflow**
  Fast and reliable checkout process increases productivity by freeing up staff members time to manage other critical circulation needs
- **Private and Secure**
  Patrons can checkout materials quickly and confidentially without waiting in lines at the circulation desk
- **Easy to Implement**
  Express Check-IT module is integrated into Atriuum and easily deployed

Access At Your Fingertips

Here are
a few ways our ID accessory can be used with other systems:

Food Service Applications - We have built BioConnect™ to work with most of the common food service systems found in schools today. Once installed you can expect food service line speed and efficiency to improve up to 100%. We also have added the ability to insert additional key presses to save the operator time from redundant key presses for each student.

Attendance Applications - You may wish to add our finger identification system to improve the accuracy and speed of positive ID attendance. BioConnect™ can be adjusted to insert the identification your attendance program is expecting.

Medication Distribution - (Med Tracker) School Nurses enjoy the quick identification, the display of medication prescription, and the fully automatic documentation of the medication administered.

Resource Room Attendance - (Room Tracker) - If keeping track of resource usage has become a chore, replace your sign in sheets with Room Tracker. This product will finger ID each student, then display a customizable menu, so that they select the resource they will use, then the entire transaction ID, resource, and date &time stamp, are all entered into a database. You can easily generate all sorts of reports for review of room usage.

Front Door Visitor/Volunteer/Student tracking - (KeepnTrack™) Our finger ID system has been successfully implemented with front door tracking software. This system is an excellent tool to control and identify the traffic going in and out of your school. With our finger identification added, the control of volunteers and students will be more accurate and speed enhanced.

Educational Price:

1- BioConnect ™ system $995

Quantity discount schedule available upon request.

1 - BioConnect™ System includes 1 finger scanning device, enrollment software, database capable of up to 5000 IDs, and the BioConnect™ software needed to seamlessly interface finger IDs to any Windows® applications.

Library Circulation Software - Let BioConnect™ improve the speed and accuracy of your library circulation. Students quickly become accustomed to automatically identifying themselves as they approach the circulation desk. This of course saves time in the circulation process which can be a real value. Also you may wish to allow full self-checkout with this positive ID system.

Staff Time and Attendance - Add the BioConnect™ system to time clock software, or use Room Tracker for keeping track of staff time and attendance. This is accurate, with no ability to buddy punch in or out.

Door Entry Systems - A very viable use of the BioConnect™ system is to authorize door entry. Add this to automated doors and save cost in re-keying for lost badges or keys. Both indoor and outdoor options available.

Special Event Attendance - BioConnect™ can be used with software designed for event attendance or to gather IDs or names in a text or word processor file.

Bus Loading Systems - The sometimes complicated and difficult task of quickly making sure each student gets on the correct bus can be greatly simplified with BioConnect™ .

Portable ID Needs - There are many applications that lend themselves to portability of finger ID. Let us help you set up a system on either a portable system or a semi-portable system with wireless access.

We are also very receptive to customizing for unique requirements!

System Requirements

- Pentium or better processor,Pentium IV or better Processor recommended for speed sensitive applications, such as lunch lines.
- Windows 98, Windows 2000, Windows NT, or Windows XP
- VGA, SVGA Display
- USB Port (Universal Serial Bus)

BioConnect™

Universal Finger Identification

√ Lower the Identification cost,

No need to make individual ID cards or remake them when they are lost. With a one time purchase of our system at very low educational rates you can add finger ID throughout your school. Our database is networkable so you can add more fingerprint devices with more applications without having to re-register prints. You also can have multiple ID numbers controlled with this system

√ Improve the speed, √ Improve the accuracy,

Even very small schools where identification is not a problem are adding finger ID systems to improve speed and accuracy. Add finger identification to any of your Windows® compatible software with BioConnect™. With our seamless interface, any time your program prompts for ID number, Password, PIN, First or Last name, replace this entry with the touch of your finger.

√ Protect the identification of your students.

This form of identification cannot be lost or stolen! This is one of the safest forms of identification, in that once registered, only the individual students can identify themselves in your applications throughout your school, and only when they place their finger on the reader, can they be identified. This puts control of their identity in their own hands.

√ Avoid sensitive privacy issues!

Our system *DOES NOT* store the fingerprint image!

This keeps privacy rights in check. There is no need to allow sensitive ID numbers to be used.

Applications: If you have an application idea not listed, we would be happy to discuss customization!
